

Modernizing Healthcare Check-In

A self service solution that streamlines the patient journey

CHALLENGE

When patients need to visit a healthcare facility, the last thing they want to do is fill out a bunch of forms, and then have to wait while staff manually enters their data. For staff, being burdened with piles of paperwork means less time they can spend interacting more meaningfully with patients. Paper-based check-in is a cumbersome, unpleasant experience full of inefficiencies, errors and expenses.

SOLUTION

Aila's Interactive Kiosk-based check-in solution for enterprise healthcare optimizes patient registration. Compatible with any iOS-based front-end software, Aila's effortless scanning and endless flexibility empowers providers to streamline the entire patient journey from check-in to checkout.

BENEFITS

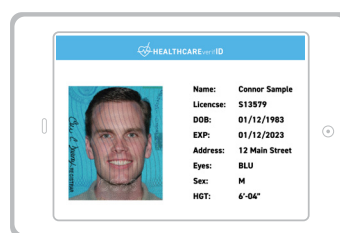

By enhancing the efficiency and accuracy of patient data collection, Aila's check-in solution, on average, **saves providers tens of thousands of dollars per location per year** while eliminating mountains of wasteful paperwork.

- **ENHANCE PATIENT EXPERIENCE:** Self service efficiency saves 10-15 minutes per customer interaction
- **IMPROVE EFFICIENCY:** Eliminating manual data entry dramatically reduces the clerical burden on staff
- **REDUCE ERRORS:** Eliminate keystrokes with scanning and form autofill, ensuring accuracy of patient information
- **PREVENT FRAUD:** Reduce fraudulent claims with automated verification of identification and insurance coverage
- **INCREASE THROUGHPUT:** Enable faster patient processing without additional staffing

1 SCAN & CAPTURE

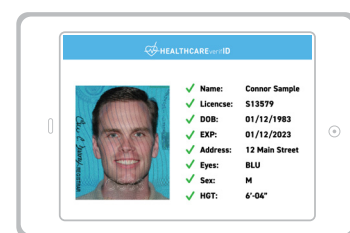

2 PROCESS & POPULATE

Accurate information is automatically populated

3 DIGITIZED & VERIFIED DATA

50+ forensic tests, including biometric facial recognition, performed in less than **5 seconds**

10-15 minutes
saved per patient check-in

2,000+
deployments

1 million+
patient check-ins

From check-in to making payments and scheduling follow-up appointments, Aila's secure and hardened solution **enhances the entire patient journey.**

FEATURES

- **DEPLOY ANYWHERE:** Versatile iPad-based hardware designed to deliver exceptional customer experiences in any physical environment
- **SMART SCANNING:** Effortlessly capture, digitize, and autofill information from IDs and insurance cards, reducing input time from minutes to seconds
- **VERIFICATION & AUTHENTICATION:** Authenticate and verify IDs in seconds, powered by Acuant, the leading global provider of identity verification solutions
- **EXCEPTIONAL VERSATILITY:** Integrates seamlessly with iOS-based front-end software, as well as leading EMR/PMS/EHR solutions
- **ADA COMPLIANT:** Secure mounting options that meet the standards of accessibility set by the Americans with Disabilities Act
- **ROBUST PARTNER ECOSYSTEM:** Access a network of Aila partners that can assist with front-end software development, data integration, hardware procurement, mobile device management, and more

I waited less than 5 minutes to get labs done. Super easy and convenient. Friendly lab tech, too!"
